

229 Electromechanical Dragging System Lock

Simple dragging lock with double intervention system, patented, 21mm bolt throw, turning 300º, and 3 blocking points. Key retained when in open position. **The number of combinations of the lock is 870, and each user key combination has it own emergency key combination.**

Operating instructions:

-Coil, included into the lock, unlocked it when received a positive match, leaving the lock ready for opening by the user key. In case of power failure the lock can be unlocked mechanically using the emergency key, which performs the function of the coil.

- AGA supplies as a standard the lock with asymmetrical profile and 2 keys AGA-11G, coil with connection and emergency key.
- Different length of key pins available.
- Locks keyed alike option available.
